Art Unit: 3738

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 41, 68 and 69, drawn to a method of inserting a spacing member, classified in class 623, subclass 17.11.
- II. Claims 32-40 and 42-67 drawn to a method of inserting a spacing member in combination with applying compression to posterior portions of adjacent vertebral bodies and/or utilizing a trial spacer, classified in class 623, subclass 17.11.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require particular features of the spacing member such as the external concavo-convex contour. The subcombination has separate utility such as in endoscopic or other common procedures that exclude the compression of posterior portions of adjacent vertebral bodies or the use of trial spacers with sharp edges.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3738

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
